4. Minimum charges for Computer usage considering 30% depreciation and Transportation maintenance apart from running cost can be considered yearly overall expenditure and be divided among students.

Over all schools, whose fee structure is more than 25,000/- P.A can reduce 20% to 25% plus in the best interest of students continued learning and support the parents during COVID circumstances. (Rounding off with Term fee and Special Development fee both)

**Its appreciating that many members were also in the similar opinion expressing voluntarily reducing more than 25%, having regret even after that their parents have not even got admission done with part payments out of payable fee.**

In such situation KAMS advises its members to call the parents once, take explanation and undertaking in written, by providing one more chance for few days, if not honoured of minimum admission, when it's a part payment, then the management shall have all rights to take action lawfully as per available Hon'ble High Courts directions. "Advice to go hand shake method understanding parent's situation too as you know your individual parents best."
